Next Era of AI Agents

AI Fleets at Enterprise Scale

Federico Torreti

Sr. Director AI/ML
Oracle Cloud Infrastructure
October 14, 2025

Egor Pushkin

Chief AI Architect
Oracle Cloud Infrastructure

AI growth will have a significant **impact** on how we live and work

300%

Higher revenue growth rate per employee who are exposed to AI.

45%

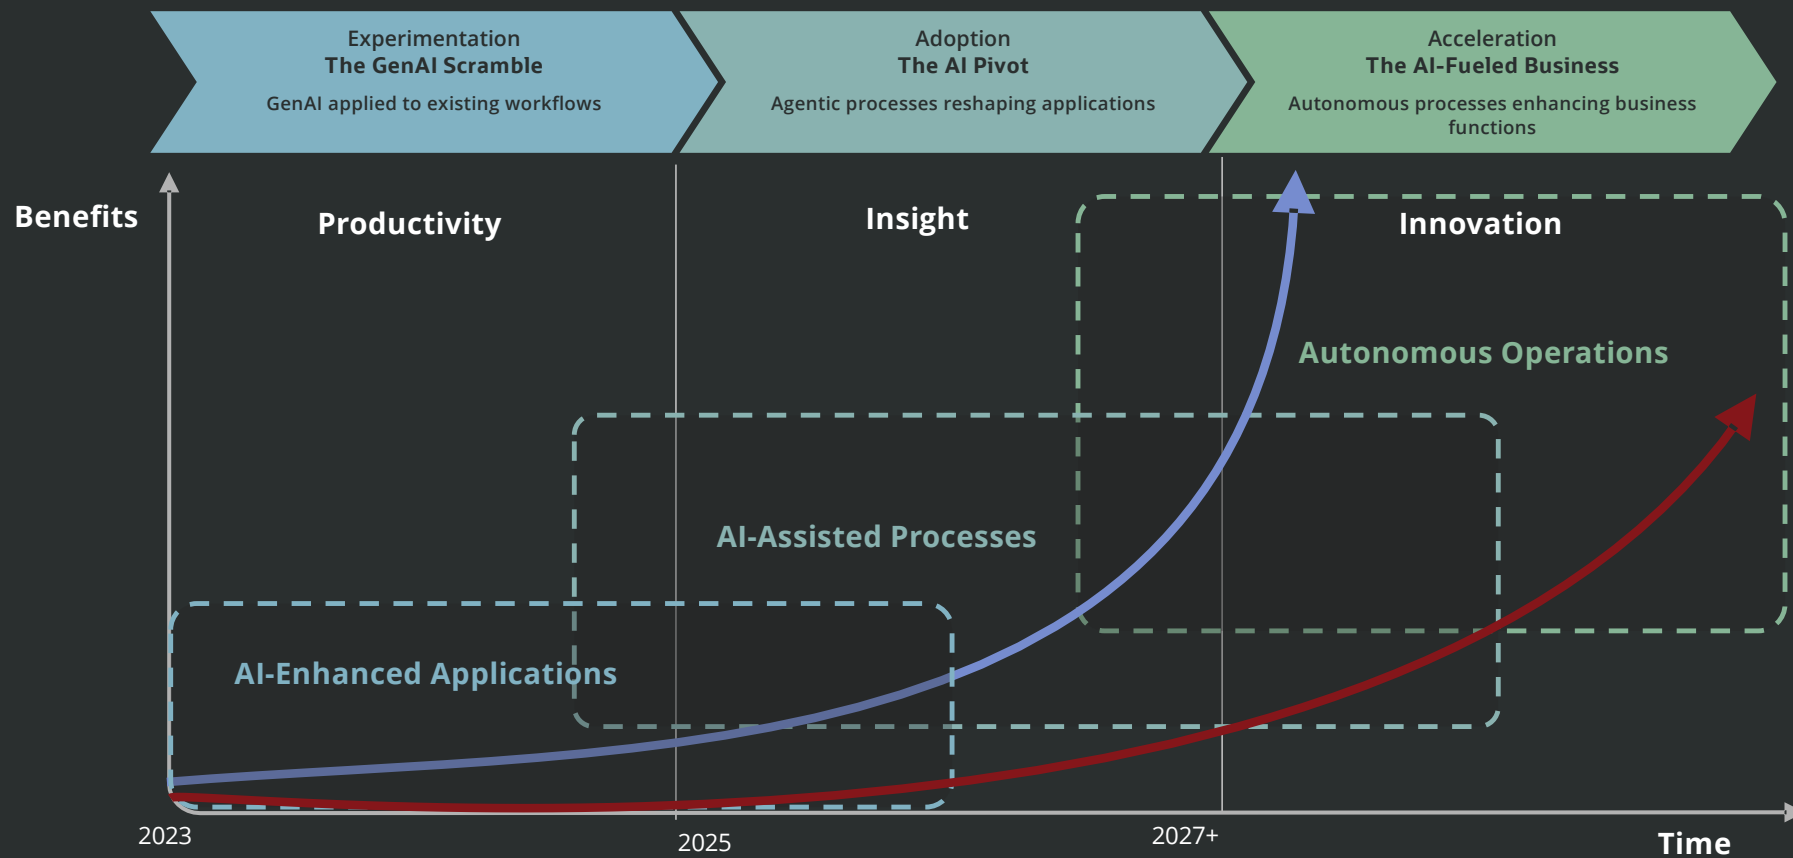

Reduction in data processing errors across multiple industries.

40%

Of working hours across industries impacted by LLMs by 2030.

Sources: PWC, KPMG, Accenture

Organizations are enabling their AI future across enterprise applications and platforms

Source: IDC Research 2024

Agent workflows securely operating across systems

Single agent

Multiple agents created and deployed across a single system of record.

Cross-application

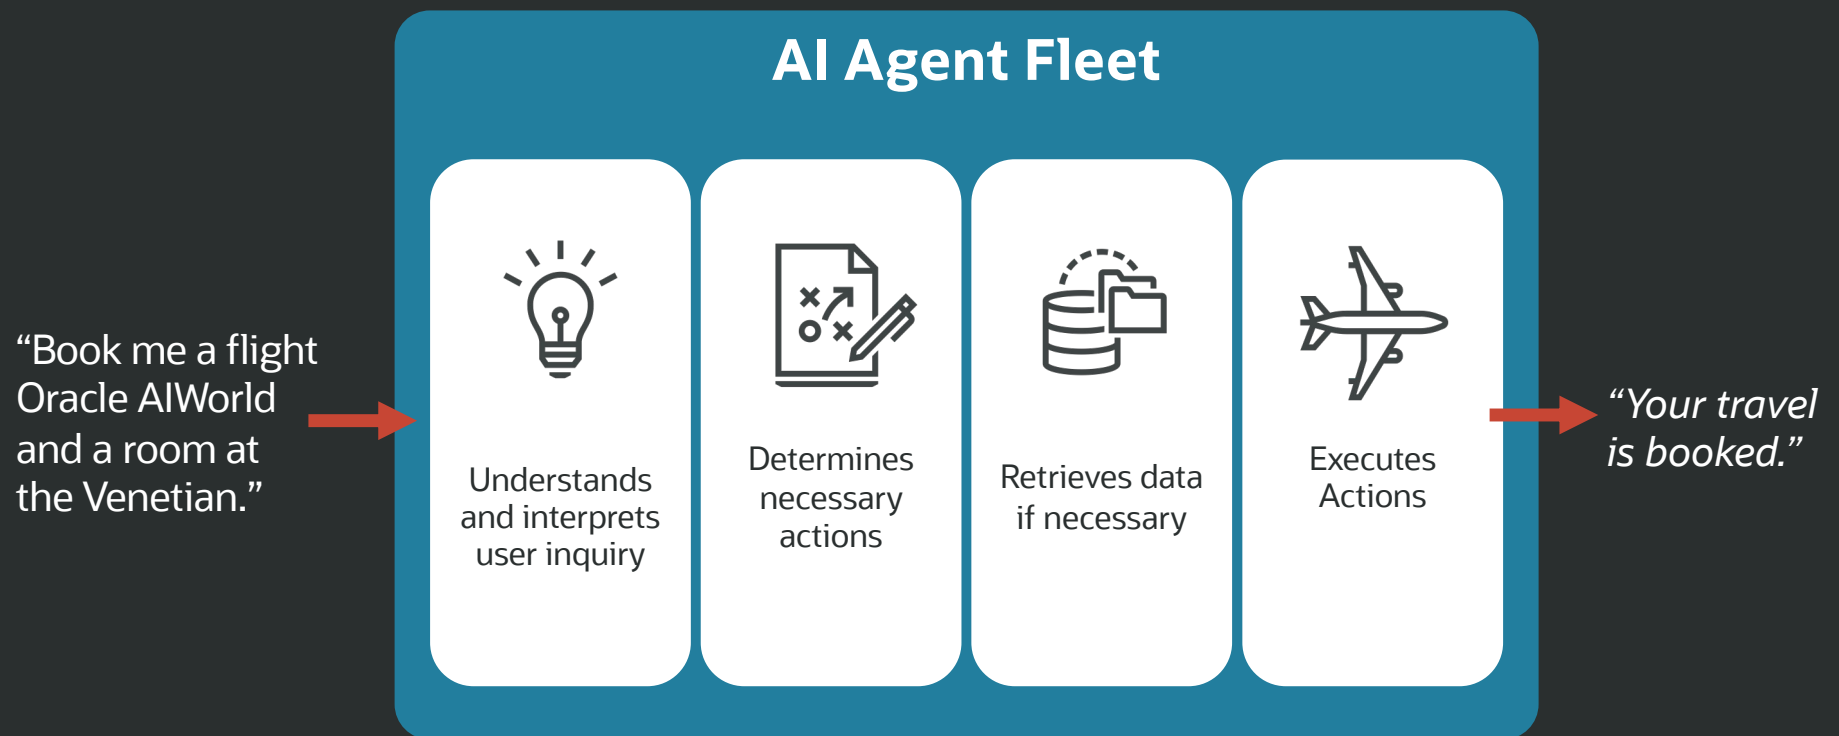

Multiple agents created and deployed in more than one system of record interacting through protocols.

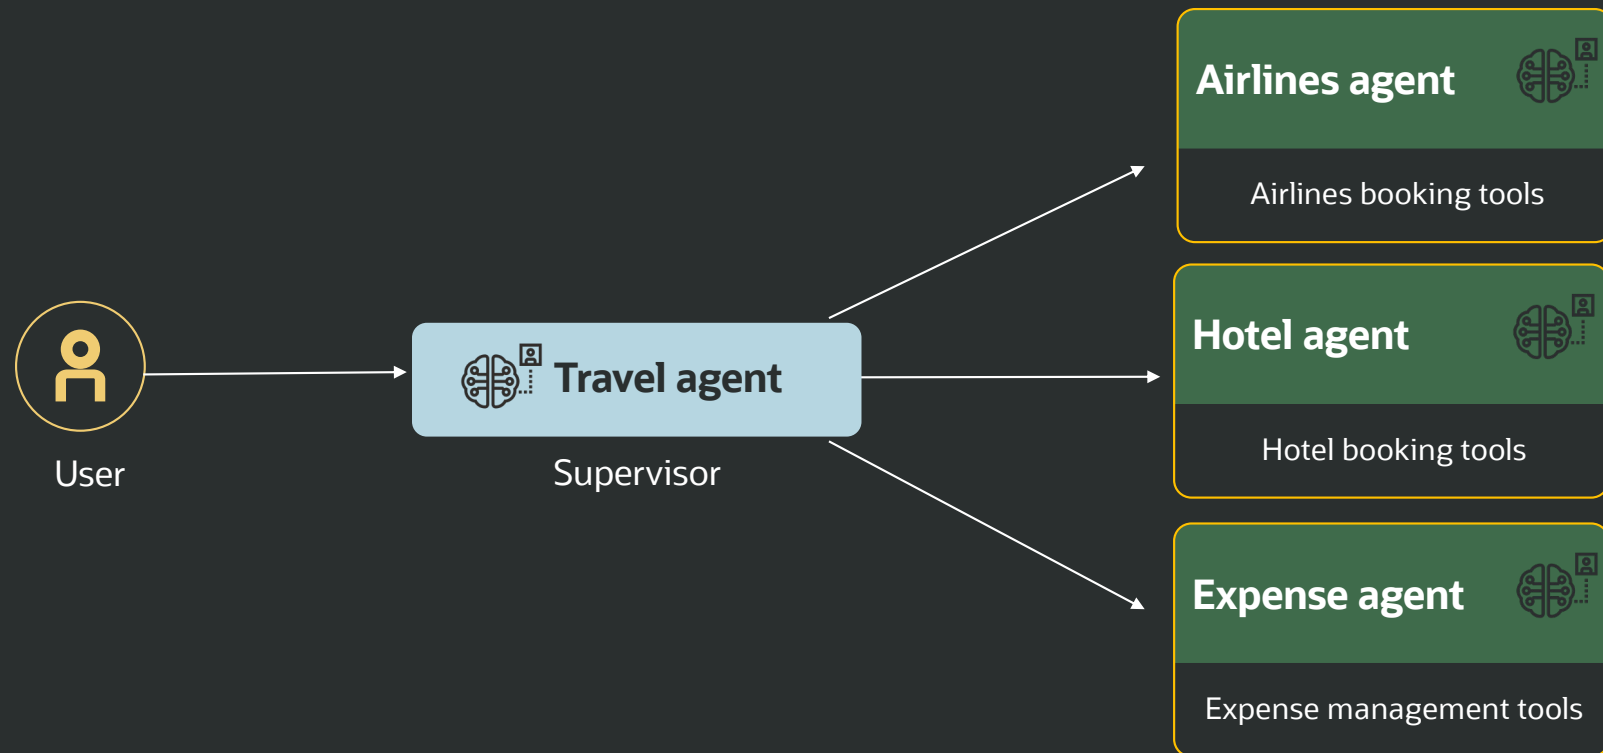

Agent Fleets

Coordinated group of AI agents that operate together to solve complex tasks - enabling **collaboration, specialization, and automation** across complex, enterprise-wide workflows

What can an AI Agent Fleet be designed to do?

AI Agent Fleets: Relying on experts while keeping data secure

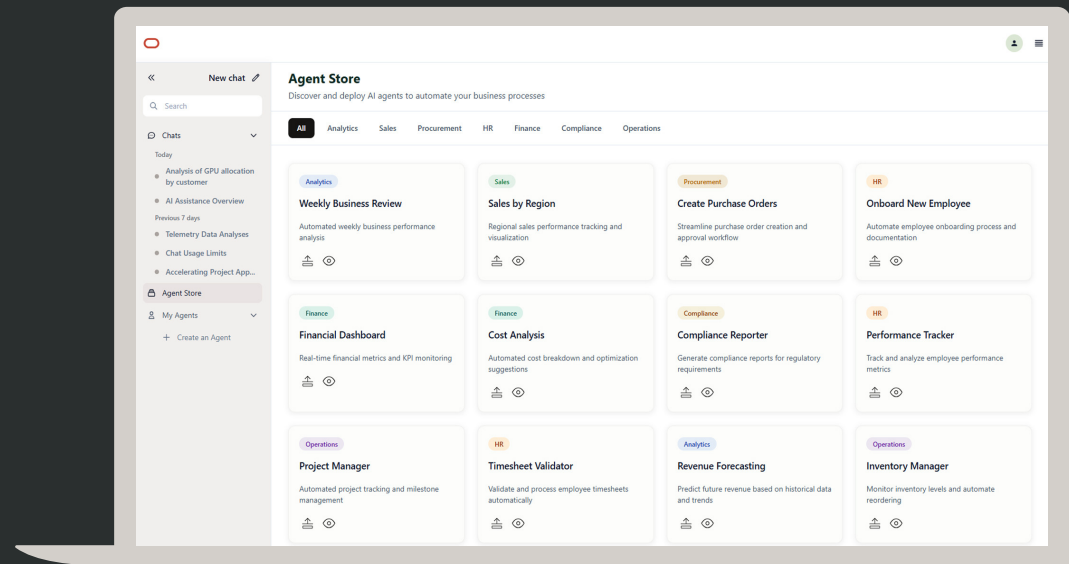

Complexity of managing agent fleets looms

Agent registry: centralized directory and management system for all agents within a fleet.

Benefits:

- Track and govern
- Improve security and compliance
- Enable scalability
- Facilitate collaboration and orchestration

AGNTCY:

an open-source infrastructure that enables discovery, identity, messaging, and observability among AI agents from different vendors and frameworks

Julu Panat

Director, Product Management,
Outshift by Cisco

A Proud Project of  THE **LINUX** FOUNDATION

An open source project for inter-agent collaboration

The AGNTCY is where we are building the Internet of Agents to be:
A diverse, collaborative space to innovate, develop, and maintain
software components and services for agentic workflows and
multi-agent software.

Best practices for multi-agents

Define clear objectives

Prioritize security

Manage context and protocols

Define and monitor interactions

Key takeaways

Agent Fleets are coordinated group of AI agents that operate together to solve complex tasks

An agent registry is a centralized directory and management system for all agents within a fleet.

OCI AI services works to support protocols like MCP and A2A in collaboration with AGNTCY.
