FDI Overview

What makes up Fusion Data Intelligence?

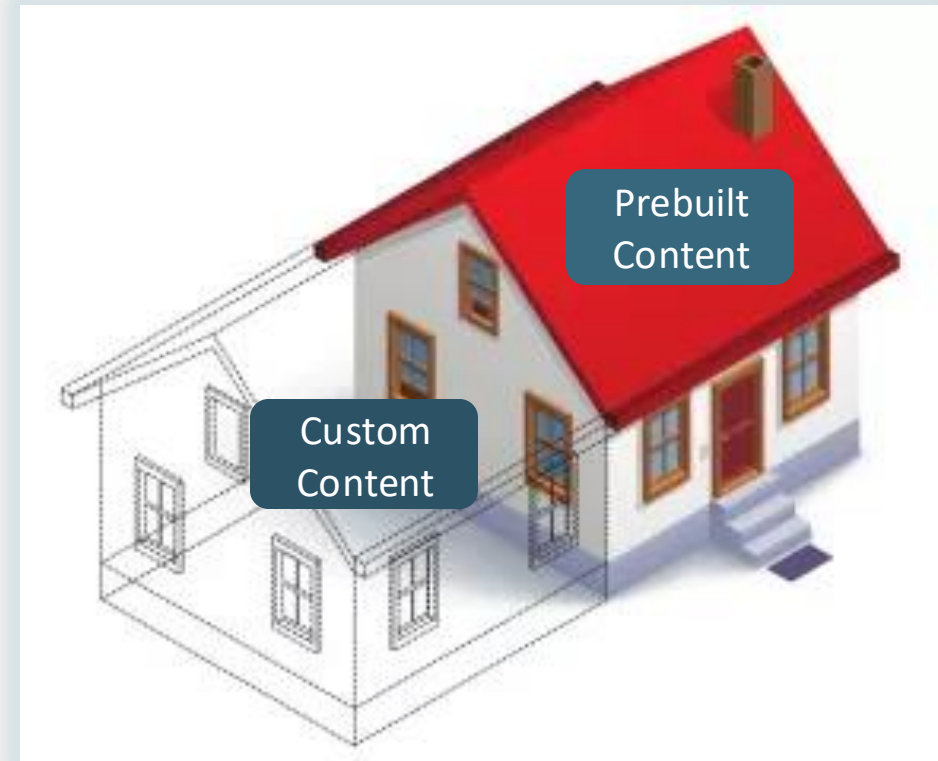

FDI is like a house

Prebuilt content prepared by Oracle:

- Prebuilt furnished rooms: your prebuilt content, dashboards, and reports.
- Prebuilt insights accelerate your decision-making. Understand your data quickly, create reports the drive your business forward.

Custom content:

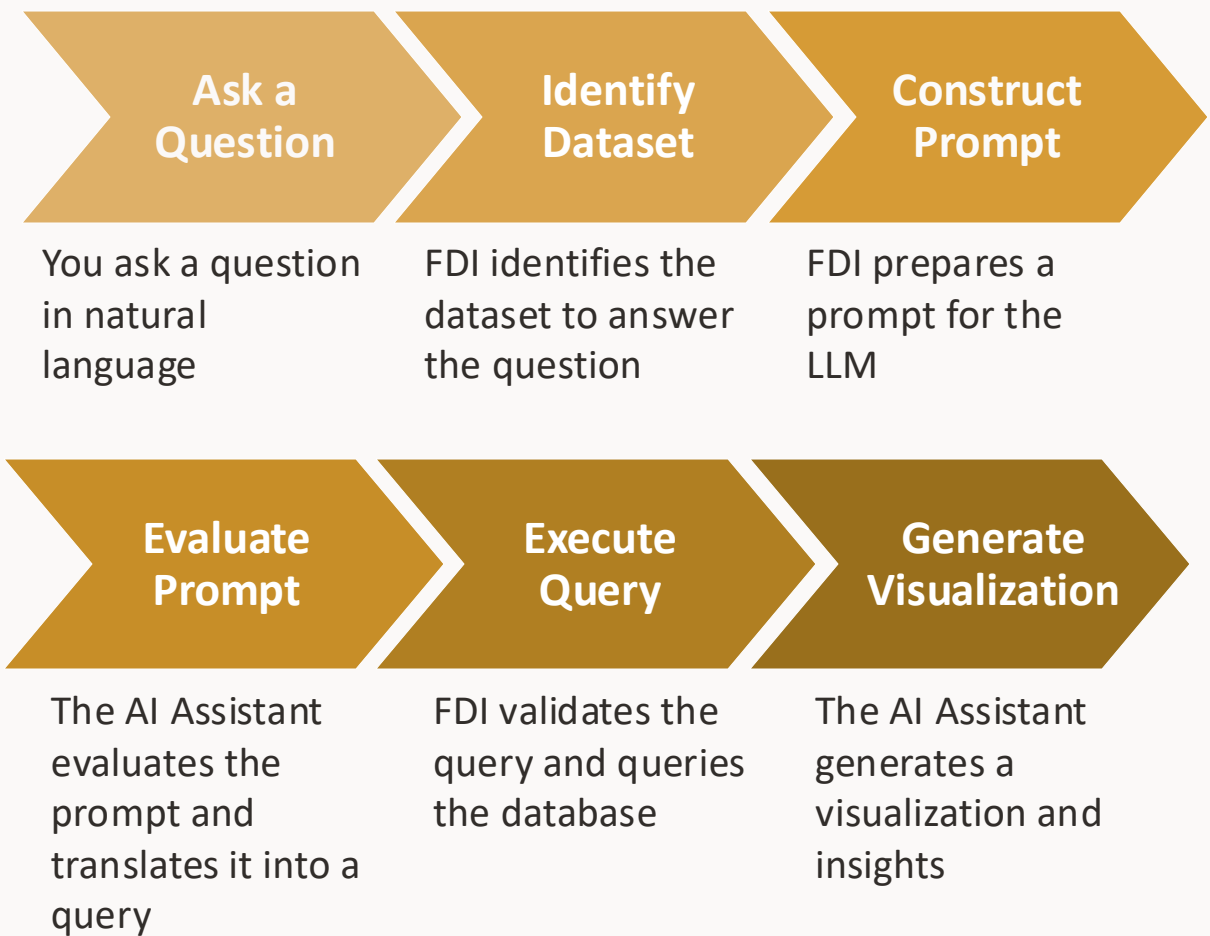

- You can customize prebuilt dashboards or create your own dashboards.
- You can also bring in external data and connections to add “additional rooms or furniture” to your house.

Tuning your Metadata for AI

Understanding the Role of Indexing for LLMs

Use the Index

- Control what users can ask about
- Help the LLM understand your data
- Identify frequently-filtered columns

Provide Synonyms

- Clarify technical metadata for the LLM
- Disambiguate similar data columns
- Help LLMs identify defaults

Considerations

- Beware of special characters and reserved words

How to query AI Assistant for best results

Structure questions for impactful answers

Ask Business Questions

- Don't rely on specific visualization instructions
- Use follow-up questions to get specific output

Incorporate External Context

- "How have sales trended since last summer?"
- "What is the headcount in the 3 most populous cities in the US"
- "What European cities do we have the highest profits in"

Leverage Calculation Creation

- Ask for derived metrics when needed, AI Assistant can create them
- "Is the profit margin different across my product categories"
