PENSKE ANALYTICS STRATEGY WITH ORACLE

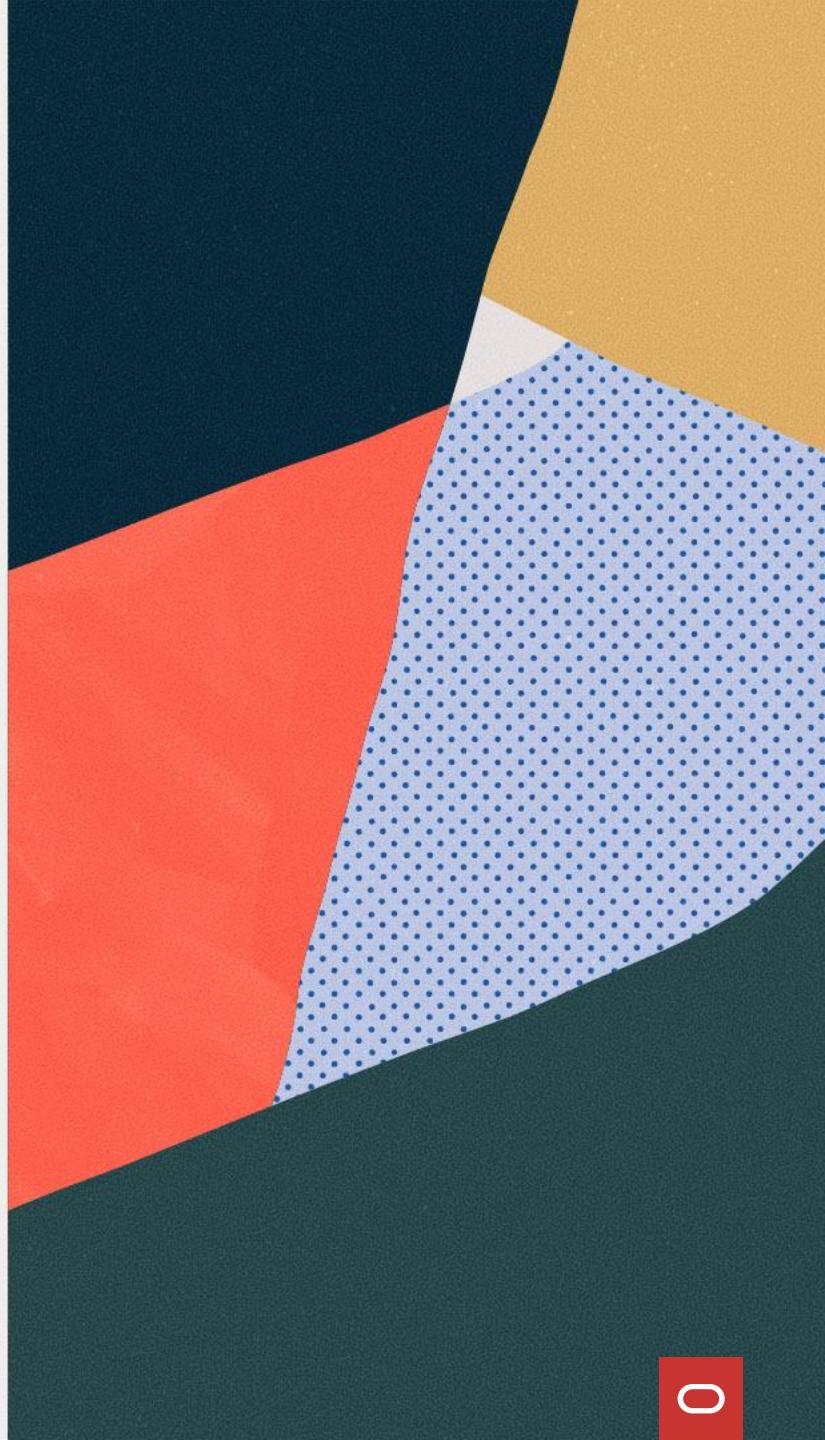

Analytics AI Assistant

- Oracle Analytics AI Assistant is a powerful feature that lets you interact with your data, using natural language, to generate visualizations and insights instantly.
- Available on all OAC shapes.
- Unlimited usage at no additional charge or additional licenses.
- Supports both datasets and subject areas.
- 100% secured, data never leaves OCI and not used for future training.

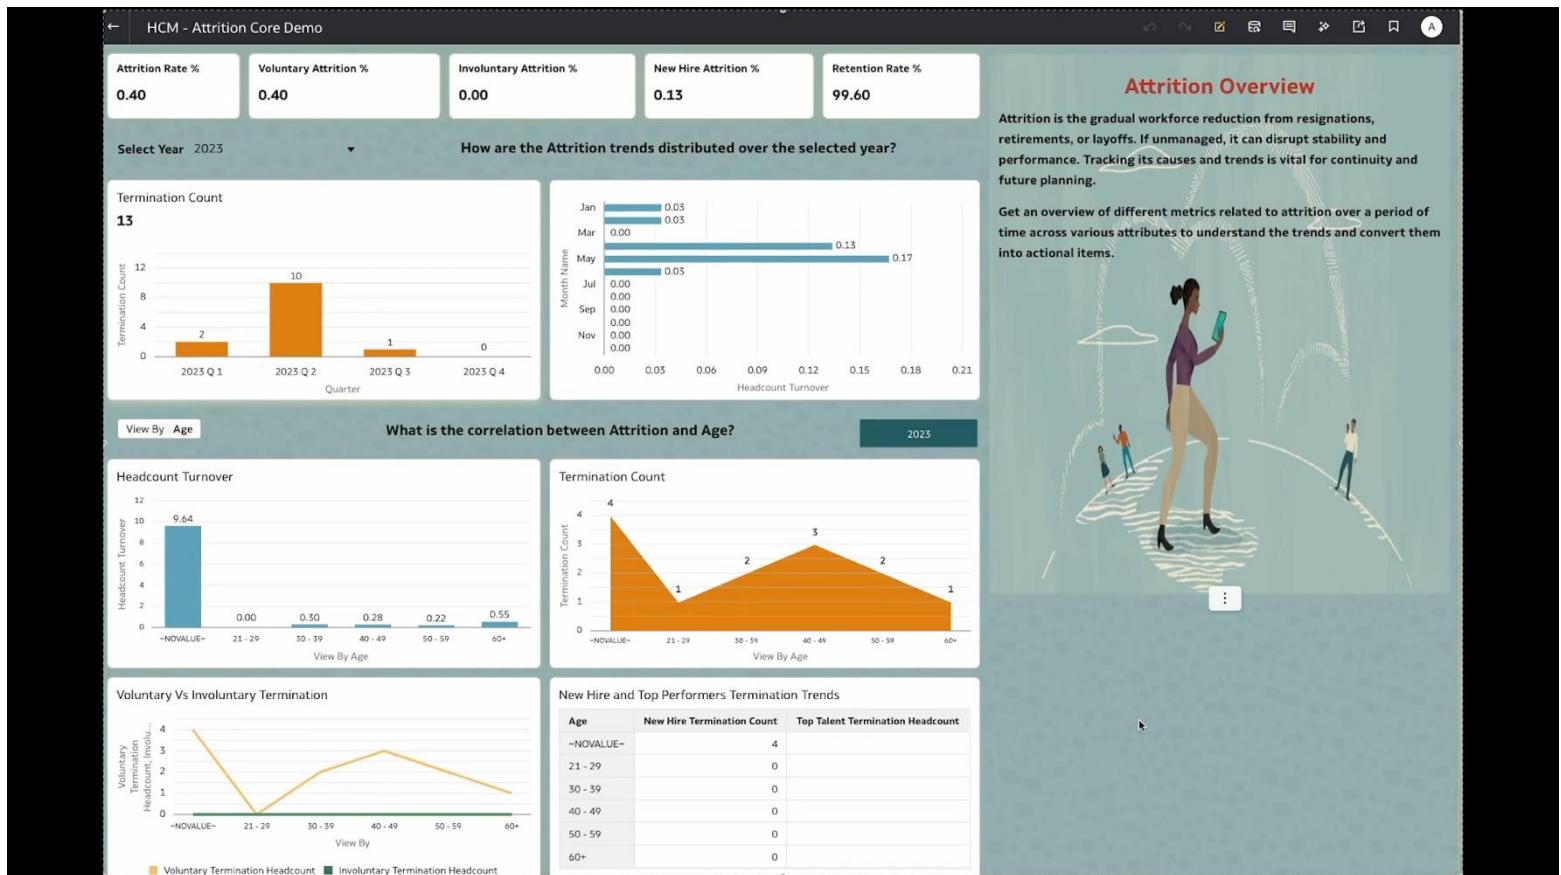

Empowering Leaders with AI-Driven Insights - Uncovering Attrition, Skills, and High-Performer Stories Instantly

- Attrition: Uncover workforce patterns and root causes of attrition - helping HR leaders act on early warning signals and retention opportunities.
- Skills: Follow Zoey, a Chief Talent Officer, as she uses the Assistant to identify GenAI skill gaps, track learning progress, and build an AI-ready workforce.
- High Performers: During performance reviews, quickly spot top performers with low compa ratios or delayed promotions - enabling timely recognition and rewards.

From Data to Dialogue – Empowering Leaders to Act on Attrition Insights

- HR leaders are asking new kinds of questions - not just what happened, but why it happened, who it's impacting, and what to do next.
- Now imagine if you didn't need to navigate ten dashboards or build queries to get those answers. What if you could simply ask - and get insights instantly, in natural language?

Empowering Talent Leaders to Close the GenAI Skills Gap

- Like many leaders today, Zoey is focused on ensuring her organization is AI-ready - not just with technology, but with the right talent and skills to lead this next wave of innovation.

Empowering People Leaders to Recognize and Retain Top Talent

- It's performance review season, and as a people leader, you want to ensure your high performers are recognized and retained.
- Let's see how the Assistant helps surface those who've delivered for years but haven't been rewarded in years.

The screenshot displays the Oracle Analytics Community homepage. At the top, there's a navigation bar with links for 'Subscribe' and 'View all'. Below the navigation, there are three main sections: 'Analytics News' featuring articles like 'ORACLE AI World', 'The "AI for Data" Revolution is Here', 'Meet the New SVP Transforming Oracle Analytics', and 'Explore Data Visualizations in the Analytics Community'; 'Analytics Gallery' showing various data visualizations; and 'Analytics Videos' featuring video thumbnails for 'Oracle Analytics Cloud September 2025 Update', 'Gartner BI Bake-Off 2025', and 'Oracle Data Intelligence: Deepen Insights, Simplify Workflows, and Get Better Outcomes with Oracle Analytics'. At the bottom, there are four more sections: 'News & Announcements', 'Forums', 'Events', and 'Forums' again. Each section lists specific items with 'View all' links.

Your feedback is important.
