Fusion AI Agent Studio Product Deep Dive

Kaushal Kurapati

Group Vice President of Products
Fusion AI

JT Thomas

Sr. Director of Products
Fusion AI

What we'll cover

- 2026: the year for operationalizing AI
- AI Studio Overview:
 - Guardrails & Trust
 - Observability and evaluation capabilities
 - Seeded agent templates
 - Premium LLMs and OCI Hosted LLMs
 - Workflow Agent framework
 - A true ecosystem, including a partner marketplace
- Product Demo, Detailed Walkthrough

2026

The year for operationalizing AI

2022

ChatGPT launch

2023-24

Initial exploration

2025

From pilots to
production

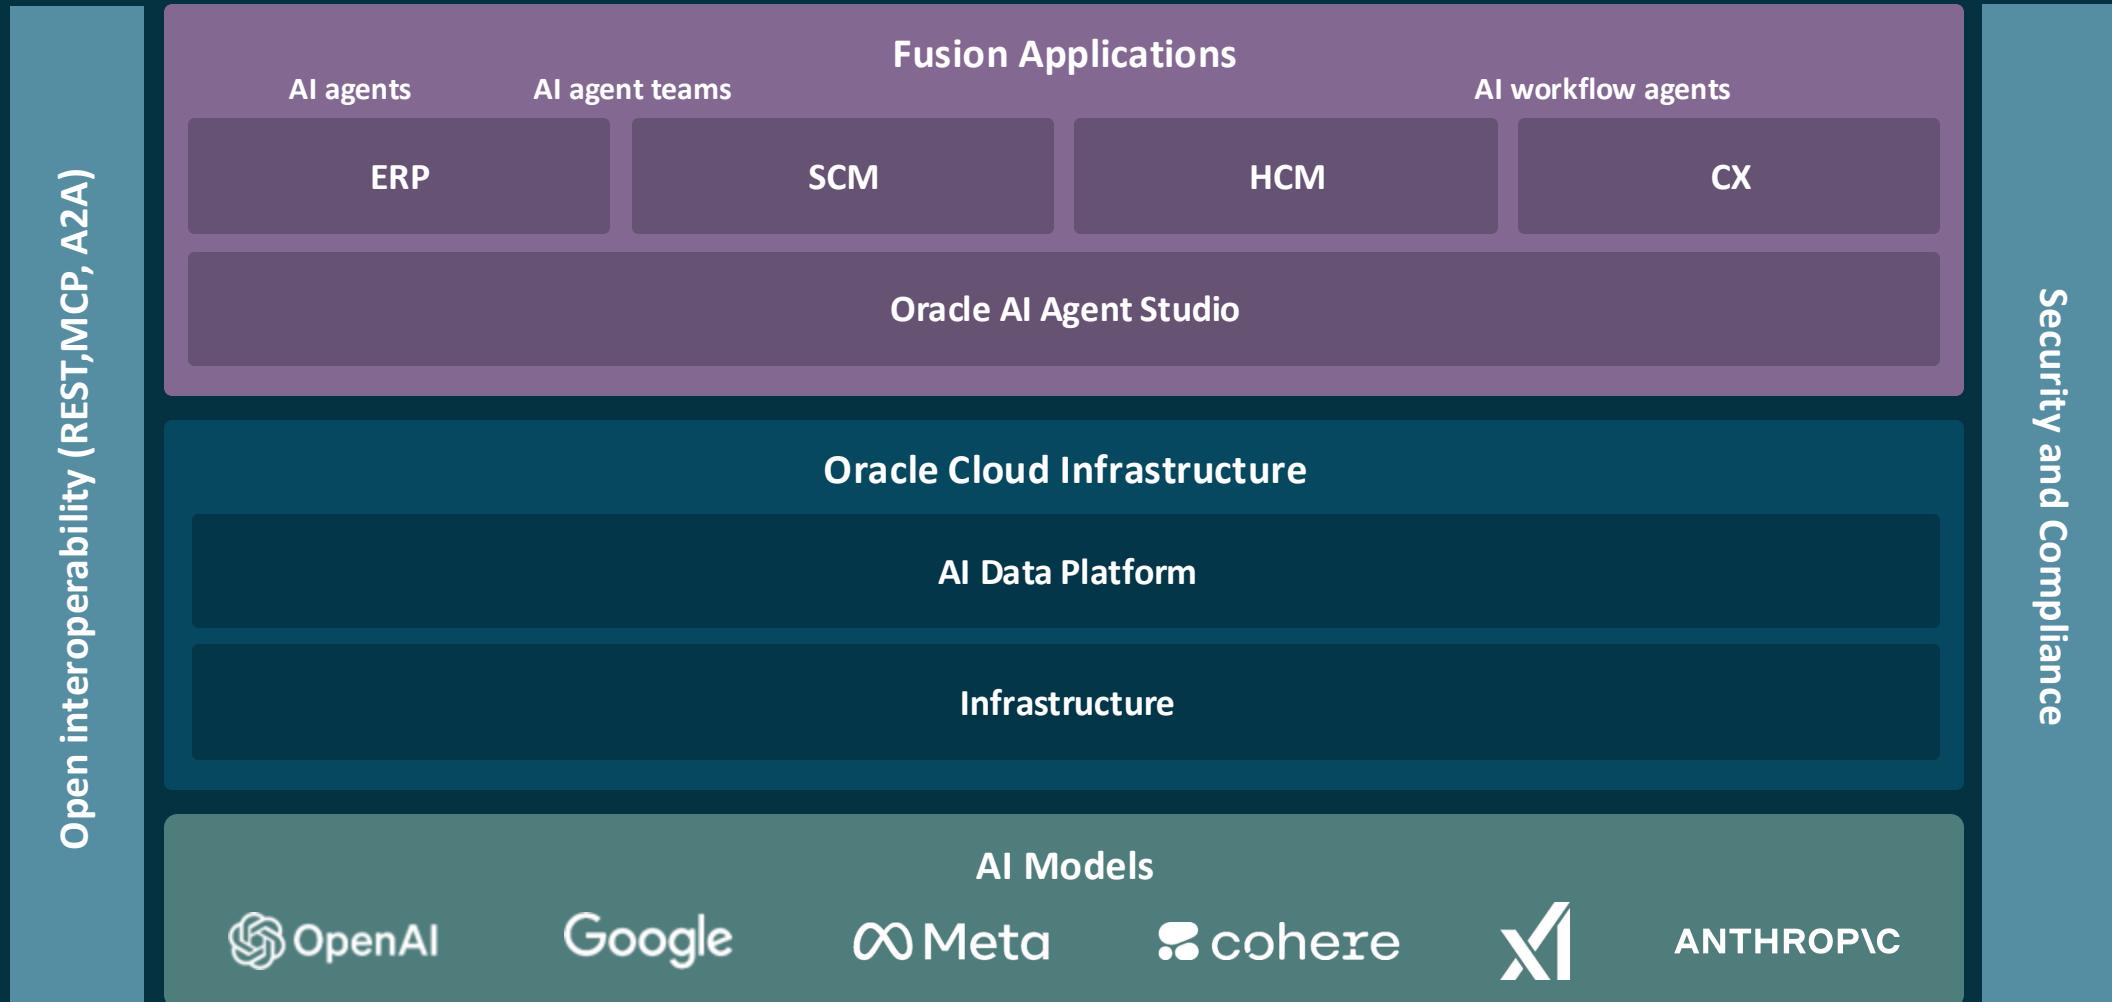

AI assistants and Q&A agents
built into business processes

2026

Operationalizing AI

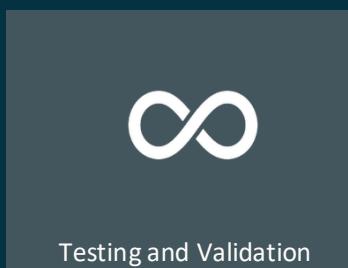

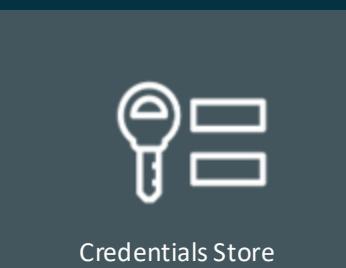

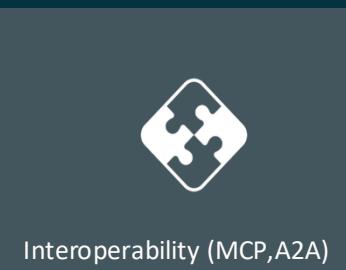

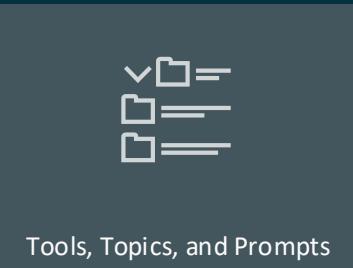

Integration, trust, security, scale

Everything you need for enterprise AI

Oracle AI Agent Studio

Create AI Agents with the
same tools that Oracle
uses.

Why you don't want to bolt on enterprise AI

Fusion AI:

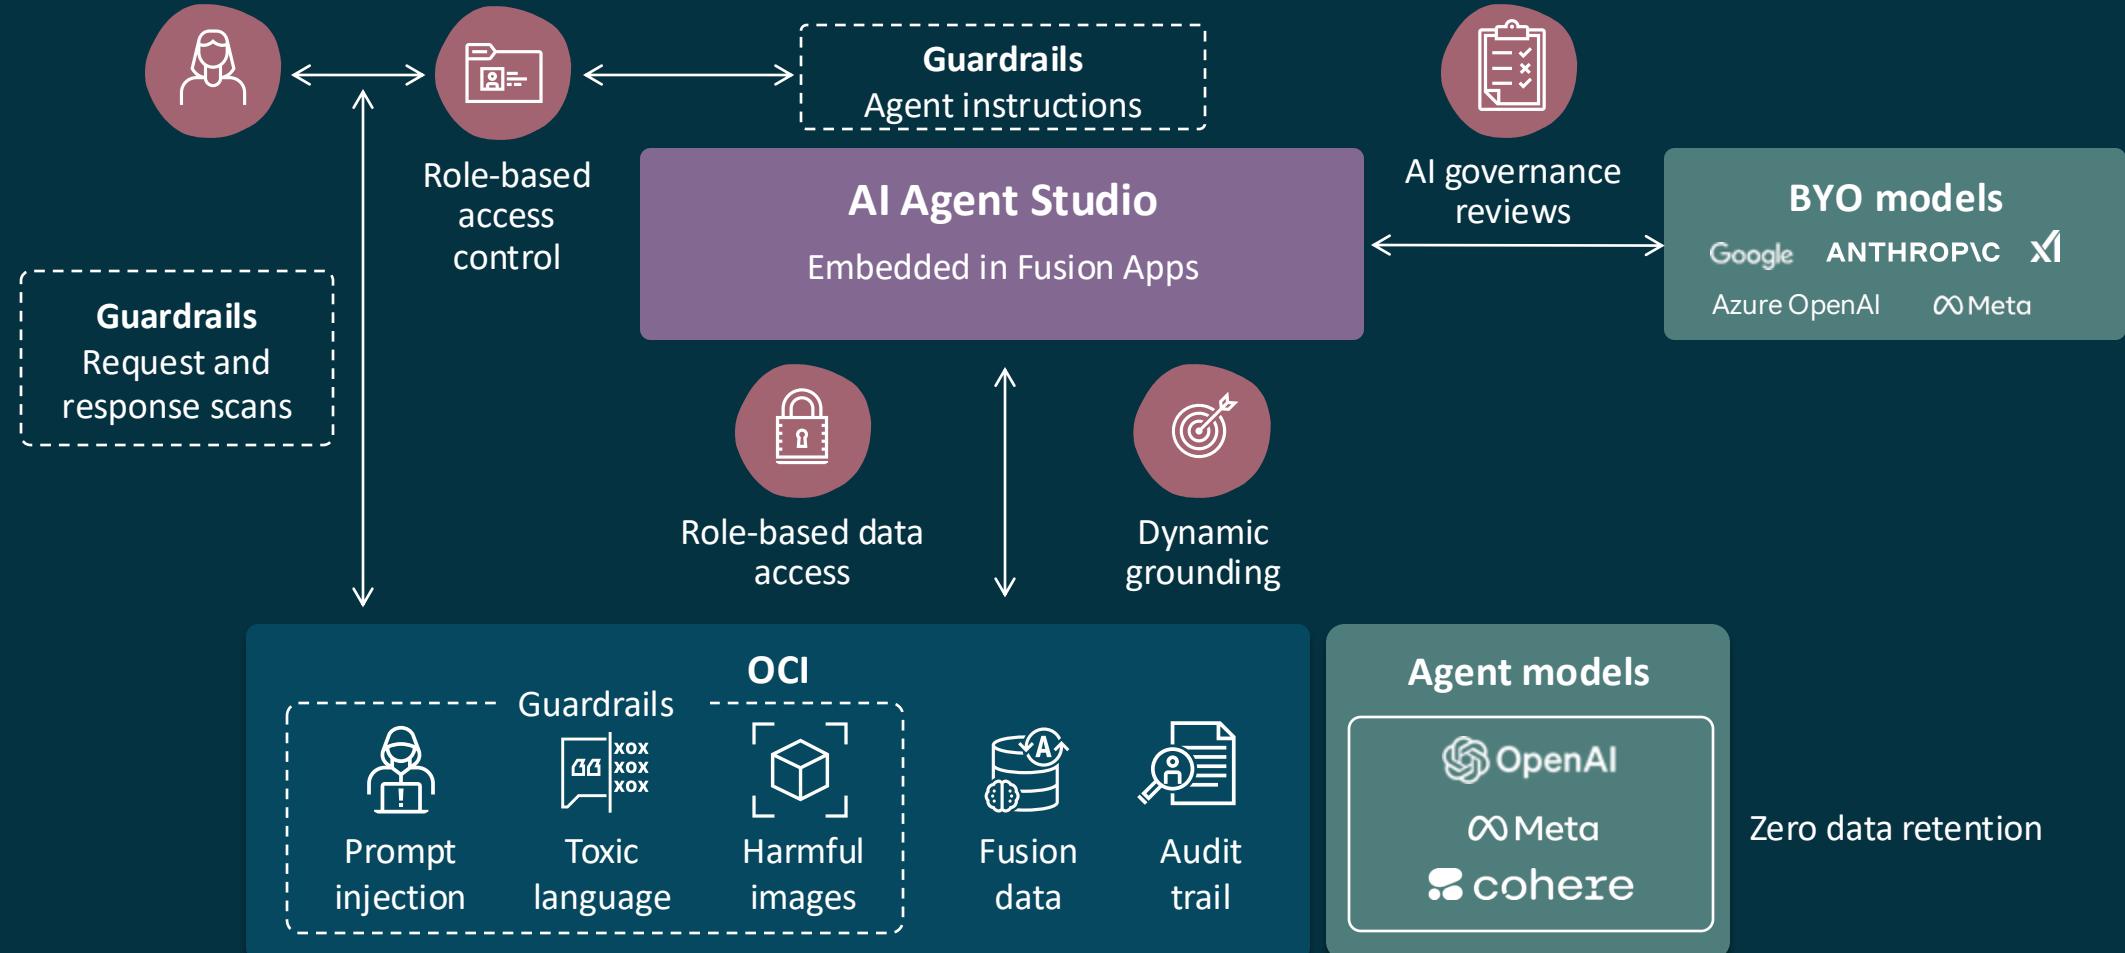

- ✓ **Integrated agent platform** – built directly into Fusion Apps
- ✓ **Native security and compliance** – roles, governance, auditability
- ✓ **Unified data foundation** – ERP, SCM, HCM, CX in one model
- ✓ **OCI advantage** – enterprise cloud for scale, performance, SLAs
- ✓ **Premium LLMs** – OpenAI, xAI, Google, Meta, Cohere, Anthropic
- ✓ **Full observability** – evaluation, tracing, monitoring, auditing
- ✓ **Enterprise-grade reliability** – grounding, fallback, hallucination protection
- ✓ **More every release** – more agents, new models, new agent patterns

Do it yourself AI:

Trustworthy agents for your enterprise

Enterprise-grade AI you can trust: secure, explainable, and compliant

Fusion AI: Explainable, Measurable, Secure

Integrated tools to test,
monitor, and govern AI agents
in production

Measure

- Accuracy and quality
- Safety and compliance
- Performance and cost

Evaluate

- Semantic correctness
- Safety checks and flags
- Latency and token use

Observe

- Dashboards
- History views
- Live monitoring

Trace

- Step-by-step actions
- LLM calls and tools used
- Full execution path

Choice of LLMs

Fusion AI models

OpenAI	Meta	AI	Google	XAI	Cohere
GPT-oss 120b *	Llama 3.3 70b	Claude-sonnet-4	Gemini 2.5 Flash	Grok 3	Command R
GPT-5 mini **	Llama 3.1 8b <i>Fine Tuned</i>	Claude-haiku-3.5	Gemini 2.5 Pro		Embed 3
GPT-5					Embed 4 <i>Multimodal</i>
GPT-4.1					Included with Fusion
GPT-4o					Customer provided

* Evaluating OpenAI Open Weights for completion, RAG, and reasoning

**GPT-5 mini is hosted by another hyperscaler

Embedded AI agents

From deterministic

→ to probabilistic

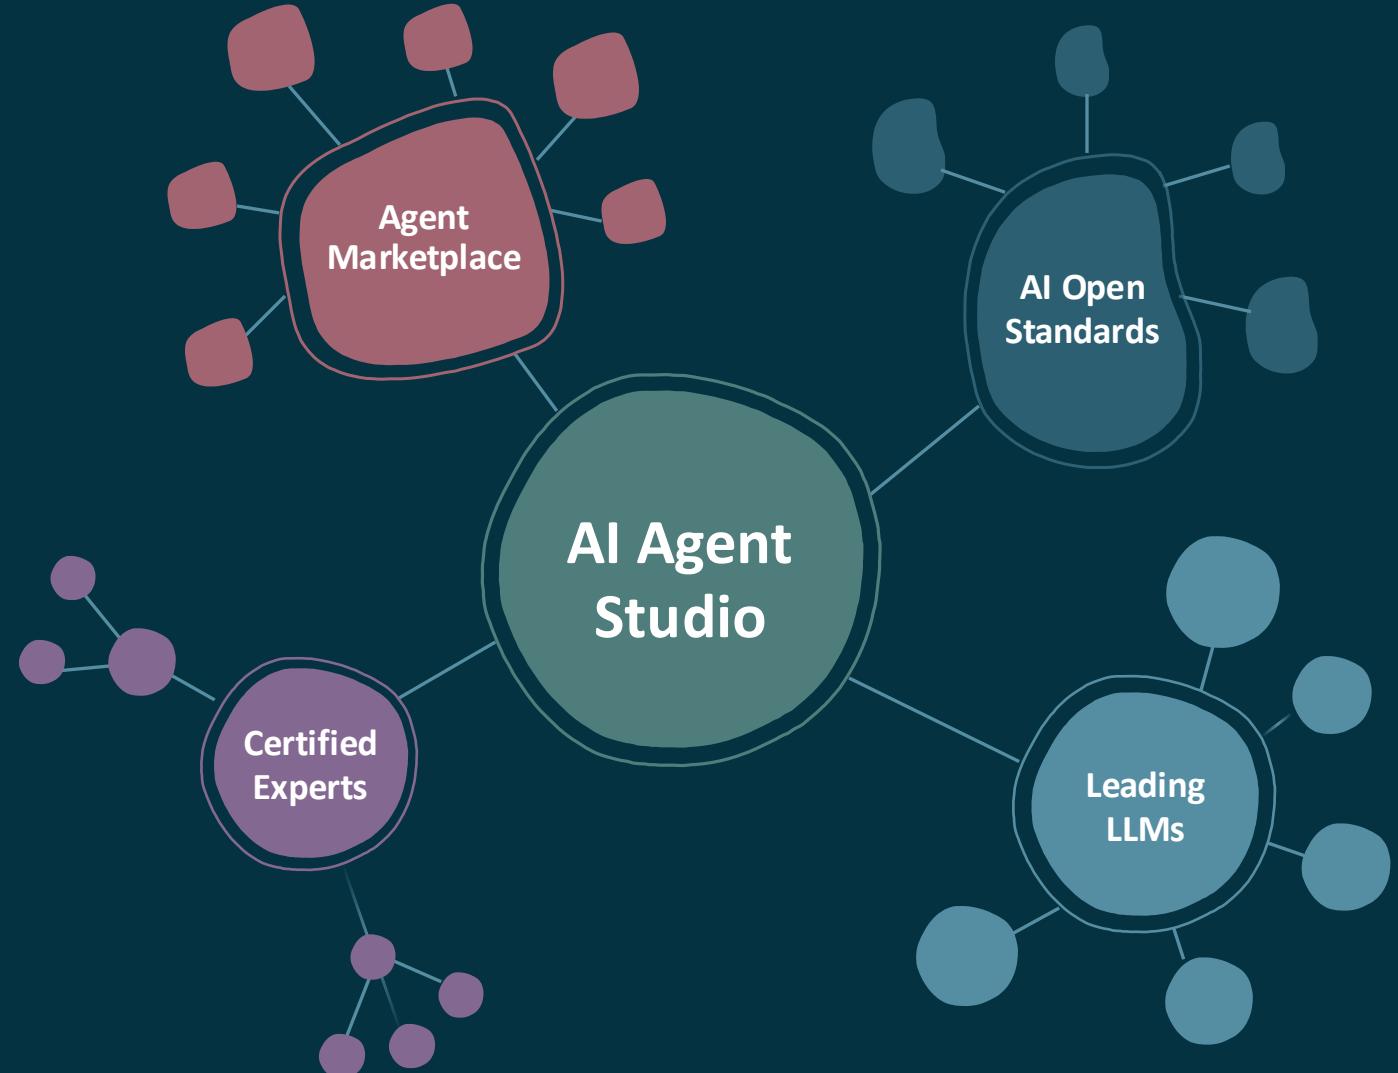

Workflow agents for document processing

	Ingest	Classify	Extract	Human in the loop	Transact in Fusion
P.O. → sales order	Customer P.O. received (PDF/email)	Recognize as order	Customer, location, products, pricing, terms	Catalog/pricing check, exceptions reviewed	Create and fulfill sales order in order management
Quote → purchase requisition	Supplier quote received	Identify as quote	Supplier, items, quantities, UOMs, currency, amounts	Confirm supplier, total amount and line count	Create purchase requisition in procurement
Court order → payroll update	Court order received (secure email or upload)	Garnishment, lien, levy	Employee, case number, amounts	Check HR/payroll records, exceptions reviewed	Apply deduction, update payroll
FDA recall → inventory quarantine	FDA recall notice received	Identify product and lot affected	Item codes, lot numbers, facilities impacted	Confirm match against current inventory	Quarantine items in inventory system, block distribution

Oracle Fusion AI Agent Studio Capability Summary

A PLATFORM TO BUILD, TEST, AND DEPLOY AI AGENTS					
Integration & Extensibility	Observability and Evaluation	LLMs	AI Agents	Multimodal, RAG	Workflow Nodes
MCP support A2A agent cards Credential store MS Teams Slack Dynamic custom headers Common integrations and connectors	Monitoring Evaluation Test dataset mgmt. Agent tracing A/B comparisons Performance metrics Token usage RAG metrics (answer & context relevance, groundedness) Improved debug Enhanced guardrails Auditing	OpenAI, Meta, Cohere, Google, xAI, Anthropic Agent Marketplace Partner-built agent templates Prompt Management Prompt libraries and lifecycle management Topics management	New agent templates Seeded runnable agent team Custom agents Agent builder assistant AI Agent Studio FAQ agent Get/put/post/patch/delete Fusion business objects Environment promotion	Image/document upload in chat Multimodal RAG SharePoint integration – RAG on external docs Workflow Agents Deterministic execution Chaining workflows Workflow as a chat agent	Agent node Doc processor, LLM, vector read/write For loop iteration Run in parallel Switch – branching logic Human-in-the-loop Code, tool nodes Email trigger, time trigger, event trigger

Introducing Fusion AI Ecosystem

INTRODUCING

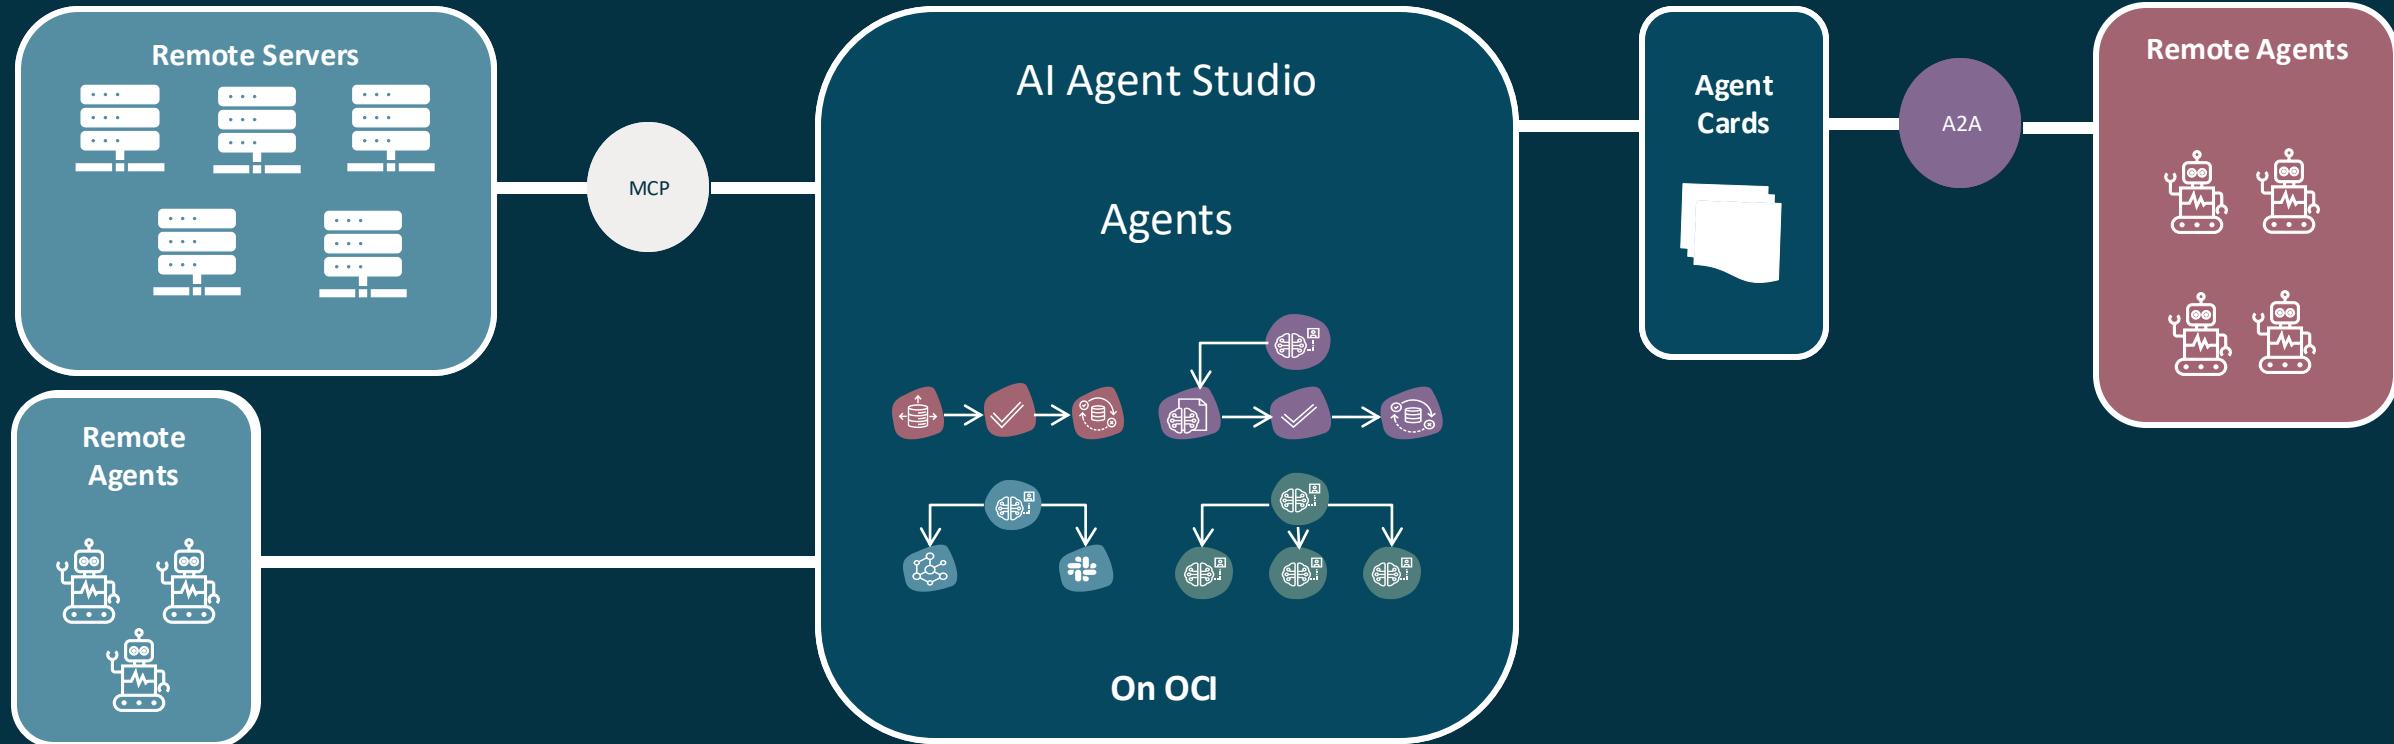

Fusion AI Agent Marketplace

Discover and deploy partner-built AI agents instantly, right inside Oracle AI Agent Studio

100+ certified, trusted agent templates built by 20+ partners

Open Standards enable agent interoperability

Fusion agent teams can include 3rd party agents via Restful APIs

Fusion agents access MCP Servers from a directory or through tool configuration

Fusion agents are published to A2A agent card registry for 3rd party agents to ensure secure, governed, context aware interactions with Fusion

Create custom MCP server connection and discover tools

- In Agent Studio, add any MCP Server credentials and create a custom MCP tool to add to your Agents to enable interoperability

The screenshot shows the 'New Tool' dialog in Agent Studio. The 'Tool Type' is set to 'MCP'. The 'Name' is 'BOX REMOTE MCP' and the 'Code' is 'BOX_REMOTE_MCP'. The 'Credentials' dropdown shows 'JT_Bearer_Token'. The 'Transport Type' is set to 'SSE'. The main configuration area contains a JSON snippet:

```
{  
  "key": "FAI_MCP_DEBAIJT_CRED_JWT",  
  "value": {  
    "cred_type": "jwt_auth",  
    "token_url": "https://api.box.com/oauth2/token",  
    "value": "\\\\appSettings\\\\:\\\\clientID\\\\:\\\\nog8permfnadk83fazl6ydt4nhq6gx\\\\", \\\\clientSecret\\\\:\\\\HD042Cf8tkq1zrtKk8xHeiWr0ORE05\\\\", \\\\appAuth\\\\:\\\\publicKey\\\\:\\\\dqtaJPRIVATE KEY-----\\\\ApBgkqhkiG9w0BBXBgkqhkiG9ncukECAgAw0BBQ0w5BQwwnMIIFLTHAQIVxA0FY\\\\wHQYJYIZIAWUDnMAwBQABAECCqGSib3DQJBQABAEq/PI/T/j2aNAJKBIIE\\\\bK+ghMxTFSeOtFw  
  }  
}
```

The 'Description' field states: 'Allow agents to securely access and interact with content from external data sources.'

The 'Select from available tools' section lists various MCP tools:

- who_am_i
- get_file_content
- search_folders_by_name
- list_folder_content_by_folder_id
- search_files_keyword
- search_files_metadata
- ai_qa_single_file
- ai_qa_multi_file
- ai_qa_hub
- ai_extract_freeform
- ai_extract_structured

Pricing and Packaging

- **Included at no additional cost:**
 - Embedded AI: Hundreds of AI features including dozens of Oracle-built AI Agents built natively into Fusion processes
 - Unlimited use of Fusion-optimized LLMs hosted on OCI
 - 200 million tokens/month towards other LLMs
 - AI Agent Studio for configuring, deploying, and monitoring agents
- **For an additional cost:**
 - Use of other LLMs, including GPT-5 mini above the 200 M tokens/month free allocation
 - Custom-built AI agents

Product Demo

Detailed Walkthrough of Fusion AI Agent Studio Features

2026 is the year to operationalize AI

With Fusion, you get an enterprise AI platform that's ready to scale

AI built in, not bolted on

Embeds automation within business processes

Enterprise-grade AI

Combines applications and infrastructure with unified data, performance, and security

Continuous innovation

Delivers new agents, models, and patterns every quarter

Your feedback is important.
